Online Trackers:

DO NOT TRACK TEST PAGE

<http://ie.microsoft.com/testdrive/Browser/DoNotTrack/Default.html>

Article about being tracked:

<http://boston.cbslocal.com/2012/06/21/online-tracking-see-the-sites-that-watching-you/>

To see who is tracking you and also a way to protect yourself by giving you the ability to shut the trackers off – download the following:

Collusion <http://www.mozilla.org/en-US/collusion/>

Ghostery www.ghostery.com

Internet Protocol Address:

“This number is an exclusive number all information technology devices (printers, routers, modems, et al) use which identifies and allows them the ability to communicate with each other on a computer network. There is a standard of communication which is called an Internet Protocol standard. In laymans terms it is the same as your home address. In order for you to receive snail mail at home the sending party must have your correct mailing address (IP address) in your town (network) or you do not receive bills, pizza coupons or your tax refund. The same is true for all equipment on the internet. Without this specific address, information cannot be received.”

DYNAMIC: One that is not static and could change at any time. This type is issued to you from a pool of addresses allocated by your ISP or DHCP Server. STATIC: One that is fixed and never changes. This is in contrast to a dynamic IP address which may change at any time.

Surf Anonymous Free

1. Hides your IP address in the Free Version
2. Will Slow your computer down
3. Paid version can be used to bounce your IP address to other countries

Hidemyass.com

1. Hides your IP address via VPN

HIDE MY ASS!

Pro VPN Web Proxy IP:Port Proxies Anonymous Email Privacy Software File Upload Anonymous Referrer

Protect Your Online Privacy Now:

Web Proxy free!

Use our free proxy to surf anonymously online, hide your IP address, secure your internet connection, hide your internet history, and protect your online identity. [Learn more »](#)

http://google.com **Hide My Ass!**

SSL security OFF Advanced options ▾

Pro VPN
Go PRO! for more beneficial features, including ...

- ✓ 50'000+ IP's in 56 countries
- ✓ Improved security and encryption
- ✓ Anonymously encrypt all traffic
- ✓ Works with all applications
- ✓ Easy to use software

up to **43% OFF**

CELLULAR SECURITY:

Android market is unregulated – Always read the terms before agreeing to installation!

Google has opted for a less rigorous certification model, permitting any software developer to create and release apps anonymously, without inspection. This lack of certification has arguably led to today's increasing volume of Android-specific malware.

iOS's security model offers strong protection against traditional malware, primarily due to Apple's rigorous app certification process and their developer certification process, which vets the identity of each software author and weeds out attackers.

**** Always read the permissible permissions before you download an application!**

Encryption Apps

During the course of an investigation, we may find we are having difficulty in determining how an individual is communicating with another person. Now in today's world, we have to look at the realization that they can now use encrypted applications via their cell phones and even their ipods to communicate in a 'stealth' manner.

Some of the more popular encrypted communication applications are:

Silent Phone	Signal	Seecrypt
Surespot	Hi	Unseen
SSE Universal	Wickr	Gliph
Encrypted Message	TorChat	Theema

*** Pinger / Textfree is an application that can be downloaded to an Ipod or Ipad and turn it into a mobile device. This application allows the user to talk and text to 35 countries for free***

APPLICATIONS THAT ARE USEFUL IN INVESTIGATIONS:

When it comes to several of the social platforms out there, we have the capability of ascertaining the geo location of the poster.

Twitter: Streamdin Map for Twitter Tweetsnearby Vizible

Instagram: Mapgram Instalook Layar

First Things First: Steps for Finding People

ALWAYS USE DIRECTORY ASSISTANCE! Remember a lot of times we can cross correlate family members names from online sites. Another thing we need to remember is the ability to utilize the sources to identify neighbors which can lead us to finding associated social platforms of our subjects.

www.whitepages.com now can provide spouse name and children's names

<http://neighbors.whitepages.com/>

- a. Will give you neighbors names and phone numbers
- b. Allows you to see who is around an address for **FREE**
- c. Will not give you an unpublished number

Spydialer.com

Free Phone Look-Up Tool
Our free phone look-up and de-confliction notification is the only product of its kind.

De-Confliction Database
Gives investigator's the choice to information share when the same number is being queried in TraX by multiple investigators in multiple places.

The phone look up is totally free. Law enforcement will need to use their government email address for the de-confliction notice. The provider information is 100% accurate regardless of porting. When subscriber information is available through known public sources, it is also provided. It will do landlines as well. Over 500 companies legal contact information identified and it will provide it to the users.

The preservation letters will be available to law enforcement in the next two weeks. This is also a free service. Our system will send the preservation request directly to the provider for you.

Facial Recognition Software

Google Images: will use Facial Recognition Software to find other places on the Web where the picture has been utilized.

1. Go to Google.com
2. Go to Images
3. Go to the Camera Icon in the white tool bar
4. Upload the Image of the person that you want to find their Identity
5. Always use a Frontal Images if possible

Google Goggles: Scans popular Images

1. Persons
2. Places
3. Things

How to find a person's profiles:

The subject's email address and usernames are what should be considered their "social security numbers of the internet".

EMAIL ADDRESS Michele@jaginvestigations.com

USER NAMES MzGrneyes13

Additional considerations: SUBJECT'S NAME, FRIENDS, RELATIVES, WORK, ACTIVITIES

To find a person's username try www.peakyou.com

Once you find the username run it through www.namechk.com

A way to find a subject's address and telephone number and email address:

www.spokeo.com

Twitter Searches

TweetPaths.com

This search will allow you to run a Twitter Username and see where they have tweeted. This will also allow you see the difference of time between tweets as well as how fast they were moving if they were tweeting while driving.

Instagram: Owned by Facebook

www.iconosquare.com

www.gramfeed.com

REMEMBER anything that was shown today can be gone tomorrow. The internet is very transient and sites come and go daily. Also, remember that there is always more than one site to locate information on and you should always search for additional sites to assist you with your online profiling.
